

## Pest Control Services

A comprehensive pest monitoring and control service, with advice on appropriate precautionary measures. The service is provided by a qualified and experienced team. Our service is also undertaken at times convenient to your business, in an unmarked vehicle. A fixed cost is provided at the start of any treatment.

### Services we offer

#### ● Treatment for infestations

We respond to requests to treat infestations of rodents and insects such as fleas, wasps and bed bugs. To provide professional advice on issues such as storage and building proofing to prevent further infestations.

#### ● Maintenance

We ensure your premises are maintained free of rodents by:

- Undertaking programmed inspections.
- Visiting at an agreed interval and time, to inspect and undertake appropriate treatment, together with recommendations for rodent proofing. We use professional rodenticide baits in appropriate baiting stations, replenished as required. Remaining bait is removed on eradication of infestation.
- Providing a written report on each inspection together with description and location plan of any rodenticide bait utilised.
